### Use of Electrical Power

**No Electric Heaters will be permitted. Do not bring coffee pots—coffee will be provided for vendors, free of charge!**

**110 Volts** – Ground fault outlets are provided to plug in **your 100 foot** extension cords. Vendors may plug in their own cord 110 volt cords, **but are not to open up the electrical panels and operate breakers.** This is due to safety issues. The cords that you plug in must be sized according to your needs and must be in good condition. They will be lying on the ground. If our electrician deems that your cords are damaged or undersized, you will be instructed to replace them.

**220 Volts** – When you return your application, you must indicate that you need 220 volt and how many amps you require. This is to provide you with enough capacity for your electrical needs. You are required to have at least 100 foot of all-weather cord. Our electrician will inspect all cords and cable hookups to make sure that they are not damaged or undersized. **Our electrician will hard wire your cables into the electrical panels and under no circumstances will any vendor be allowed to do it themselves.** The Westville Park has breakers for their panels, but we sometimes run out. Therefore, it is recommended that vendors have their own breaker, just in case. The panels are Squared D type QO. **ALL FOOD VENDORS SHOULD SEND A PICTURE OF THEIR PLUG. The festival is over Saturday at 5:00 P.M.. Only the electrician will disconnect vendors that are hard wired.**
